

MADE IN GERMANY

In southern Germany, tradition is still very much alive and is written with a capital „T“, while at the same time, this region is one of the most modern areas in the country. This combination of tradition and state-of-the-art technology has contributed significantly to the fact that southern Germany has developed into a centre of the (automotive) industry. Here, craftsmanship and many years of expertise meet high technological standards and products are created for the world market.

On the edge of the Black Forest, BlitzRotary GmbH began developing and producing lifting tables **over 20 years** ago. Based on this know-how as a manufacturer of lifting tables in interaction with leading automotive manufacturers, we present our extensive range of lifting tables.

APPLICATIONS

The lifting tables of the Master Gear series, combined with the separately available accessories, make it easy to **mount engines, gearboxes, high-voltage batteries and even entire drive units.**

In combination with a lifting platform, these lifting tables are used in particular for those vehicle components that, because of their design, can only be installed/removed from underneath the vehicle.

Lifting tables made by BlitzRotary

Tradition, experience and technological progress -
A combination that results in high-performance,
reliable and practical products

ACCESSORIES

GA passenger car: Universally applicable for passenger cars. Particularly suitable for automatic transmissions. Tensioning strap to secure the load, large rubber supporting surface, load capacity 400 kg, \varnothing 35 mm pin, dimensions 300 x 240 mm (Only applicable in combination with universal adapter, Art. No.: 103544) (Part No.: 3136)

Aggregate plate with supporting arms: Particularly versatile aggregate plate for the removal and installation of engines, transmissions, axles, exhaust systems, etc. Extendable supporting arms with integrated threaded spindles and numerous support components allow easy adaptation to different mounting requirements (Art. No.: 103802)

Universal aggregate support: Quick and safe removal & installation of the complete integral support frame, with all units in connection with the Master Gear lifting tables. A tension strap, yellow-chromated (Art. No. 107856), is used to secure it.

Universal support \varnothing 35 mm: Fitted with a bushing, a mounting hole \varnothing 35 mm suitable for holding various tools, such as the transmission plate GA passenger car (Art. No. 103544)
